**REPORT ON REPUBLIC OF PALAU CAPACITY DEVELOPMENT IN PROPOSAL  
PREPARATION USING THE LOGICAL FRAMEWORK APPROACH WORKSHOP  
10-13 MARCH 2014**

## **Introduction**

The Global Climate Change Alliance: Pacific Small Island States (GCCA: PSIS) project is funded by the European Union (EU) and implemented by the Secretariat of the Pacific Community (SPC) in collaboration with the Secretariat of the Pacific Regional Environment Programme (SPREP). The project budget is €11.4 million. The implementation period for the GCCA: PSIS project is from the date of signature of the agreement, 19 July 2011, to 19 November 2014.

The overall objective of the EU funded GCCA: PSIS project is to support the governments of nine Pacific smaller island states, namely Cook Islands, Federated States of Micronesia (FSM), Nauru, Marshall Islands, Niue, Kiribati, Palau, Tonga and Tuvalu, in their efforts to tackle the adverse effects of climate change. The purpose of the project is to promote long term strategies and approaches to adaptation planning and pave the way for more effective and coordinated aid delivery on climate change at the national and regional level.

The project approach is to assist the nine countries design and implement practical on-the-ground climate change adaptation projects in conjunction with mainstreaming climate change into line ministries and national development plans; thereby helping countries move from an *ad hoc* project-by-project approach towards a programmatic approach underpinning an entire sector. This has the added advantage of helping countries better position themselves to access and benefit from new sources and modalities of climate change funding, e.g. national and sector budget support.

### **GCCA: PSIS Capacity development in proposal preparation using the logical framework approach Project ('LFA training') in Palau.**

Following a regional workshop on Climate Finance and Proposal Preparation held in Apia, Samoa, 26 – 27 October 2012, and supported by the Asia-Pacific Adaptation Network (APAN), Secretariat of the Pacific Regional Environment Program (SPREP) and SPC, all of the countries involved in the GCCA: PSIS project expressed their interest in having a national training workshop on project proposal preparation using the logical framework approach.

This LFA training responds to that expressed need. The Coping with Climate Change in the Pacific Island Region program (CCCPIR) implemented in partnership with Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ) on behalf of the German Federal Ministry for Economic Cooperation and Development (BMZ) has assisted with the provision of logistical support for the training in Palau.

The training provides a valuable opportunity to strengthen national government staff to develop successful and integrated climate change adaptation project proposals. This will allow PSIS and donors to work together to ensure a more effective and coordinated aid delivery to address climate change at the national and regional level.

The Palau training workshop was delivered over 4 days (10-13 March 2014), with additional mentoring after hours on the 12<sup>th</sup> and 13<sup>th</sup> March 2014. Pacific Research and Evaluation Associates (PREA) were contracted to deliver the LFA training, based on the resources that they had previously developed and piloted in the Cooks Islands. The workshop was held at the Royal Palau Resort conference room and was attended by twenty nine participants.

The training made use of a donor directory (Donors for Climate Change Adaptation in the Pacific) developed for SPC and SPREP. PREA also researched additional donors active in the Pacific region who support PSIS. All relevant training resources were provided to participants in hardcopy with an electronic copy provided on a USB stick for all participants.

The key topics covered during the LFA training include a background on the project management cycle, a detailed look of the logical framework approach, proposal writing (informed by the LFA) and

a brief summary of climate change donors active in the Pacific region. A detailed delivery plan is included in Annex 1.

The LFA training workshop was organised by SPC with support from in-country Government counterparts Ms Judy Dean, Grants Coordinator, Office of the President, and Ms Amand Alexander, Office Manager, Department of Environmental Response and Coordination. Ms Judy Dean officially opened the workshop. Ms Victorina Loyola-Joab (SPC GCCA: PSIS/ GIZ CCCPIR) also provided opening remarks, providing context for the training workshop, and background to the EU funded SPC GCCA: PSIS project in Palau.

After introductions, the two training facilitators from PREA began workshop proceedings for day 1.

### **Workshop Participants**

Thirty participants attended the training over the four day workshop program representing various departments of the Palau Governments and some NGOs (see Annex 2). The training was well attended over the four days. Learner guides and slide packs were distributed to all participants, however the USB flash drives containing all resources were not delivered to SPC staff in time and therefore participants will receive these at a later date. To compensate for the USB flash drives being late, the workshop facilitators passed around a USB drive so that participants with laptops and USB flash drives could still have access to the resources.

### **Workshop Results**

Training delivery included a mix of informative presentations, large group activities to demonstrate new knowledge and skills followed by small group activities where participants were challenged to use the knowledge and skills for real-life project ideas they wanted to develop (see Annex 3 for photo of group work). There were six small project groups that worked through the LFA, representing the following project ideas:

1. Limited ability to share data in the Department of Justice
2. Poor water quality in Koror
3. Poor solid waste management
4. High rates of child abuse
5. Poor diet and high rates of non-communicable diseases
6. Large numbers of children and adults without high school diplomas
7. Palau language, culture and traditions are being eroded
8. Traffic congestion in Koror
9. Limited representation of women in positions of power
10. Coastal erosion

The whole-of-class activity focussed on improving access to reliable, current and accurate demographic data from Palau, stemming from the lack of a recent census. This topic was used instead of the case study in the learner guide.

The facilitators moved between groups to offer support and advice where required. The presence of two facilitators was valued by participants for both the presentations and the detailed group work. Start of day and post-lunch warm-up activities were conducted to refresh participants and prepare them for learning. Each day began with a recap of the preceding day and each day ended with a recap of the days' content.

The in-country staff organised a speaker from Palau's grant department, Palau's Ministry of State and another speaker representing GEF and the UN Joint Presence Office to outline the importance of the LFA in proposal writing.

The workshop concluded on day four with group performances which reflected what participants had learnt, group photo and certificate of attendance presentation conducted by Ms Judy Dean.

### **Workshop Evaluation**

The results of the workshop evaluation are presented as Annex 4. Twenty five participants who attended the four days completed the evaluation form.

The Palau training was very successful with a large number of participants attending the workshop over all four days. This indicates that they valued the learning opportunity the course presented. Participants worked well in their project groups and there was a high degree of participation, discussion and critical feedback offered in response to project group presentations.

The respondents indicated that the training was well structured, the learner guide was useful, and that they learnt new things that was useful for their work. Most participants found the course to be well structured and presented, and nearly all found that the facilitators made the course enjoyable.

Most participants indicated a strong to fair degree of confidence in being able to complete the stakeholder analysis, problem tree and solution tree steps of the logical framework approach upon their return to work. There was also strong confidence in developing a logframe matrix and putting it all together to develop a proposal.

#### ***What participants found most useful***

*LFA, all aspects of analysis, group activities to get feedback/advice, networking is important*  
*Identifying problematic areas and securing ways to resolve problems*  
*Logframe matrix*  
*Validated some things I've been doing and especially in a more systematic way that makes "life" in proposal writing easier*  
*The process itself. It shows that I need to take the time to go through LFA process. Specifically, liked the logframe matrix, templates, problem/solution tree*  
*Working on the problem (tree) and finding solutions from the problems*  
*The complete authentic process of writing meaningful proposal that will help my organisation solve the identified problems*

When asked about follow up training, participants' comments included a range of responses:

1. Logframe matrix
2. Budgeting
3. Monitoring and evaluation
4. More on proposal writing

All of the participants indicated that they would recommend the course to their colleagues. Seventeen respondents indicated the length of the training was about right, whereas seven indicated it was too short, and one too long.

Some participants wanted an extra day of training whilst others thought that it would be best spread out over a full two weeks so there was more time to work on real projects in their small groups. On reflection, the short monitoring and evaluation component of the training was very rushed in its delivery and we propose to reduce the content of this component down to a few key points to point participants in the right direction for more self-paced M&E learning as opposed to rushing through the content during the training and confusing participants or giving the illusion that the process is more difficult than is actually the case.

The participants all indicated satisfaction with the delivery, and the resources provided. The following comments reflect the success of the Palau training delivery.

*It was really enjoyable and love the energizers. You guys are awesome! I learned a lot from the workshop. Everything was well presented.*  
*Overall the training was awesome and I recommend it to anyhow who wants to learn about grant writing.*  
*Thank you for a great workshop. Please come again!*

*The facilitators were very effective in delivering the course in a more "hands on" manner as opposed to lecturing*

*I like the fact that there were 2 trainers. Not bored with one tone of voice. Come back to Palau!*

*Excellent job in having a pragmatic and practical approach in doing this workshop!*

*For the first time, I feel confident in writing a full proposal, not just assisting or contributing to a small part of the proposal. Also, last but not least, Martin & Damien rock!*

*Martin and Damien are excellent facilitators and teachers. Please come back to Palau and do more of this.*

The medium term outcomes resulting from the training will be assessed through issuing a longitudinal post-training survey (3 – 6 months after the training) combined with telephone interviews.

### **Conclusion**

The training was very successful in building capacity and motivation of Palauan government staff and NGO members. The participants noted the benefits of identifying the causes of problems through undertaking a problem analysis. Participants also noted the benefit of developing a logframe matrix, which provided a clear outline of a project to guide the development of a proposal.

Informal feedback from participants indicated that there was a strong likelihood for a number of the group projects to be developed further into full proposals. Participants also indicated that some, or all elements, of the LFA, would be used both for proposals as well as for planning in the workplace.

The impact evaluation in several months' time will determine whether any of the projects worked on during the training will be developed up into real proposals. There was also a strong interest in developing their skills further by working together to practice the steps of the LFA. The training has also provided some participants with the skills to approach problems with more confidence, and use this to find solutions in collaboration with all stakeholders.

The facilitators made the material enjoyable	24	<input type="checkbox"/>	1	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	The facilitators did not make the material enjoyable
--	----	--------------------------	---	--------------------------	--------------------------	--------------------------	--------------------------	--

For each of the following, please rate your level of confidence in being able to undertake the following steps of the logical framework approach when you get back to your job.

	<i>Very confident</i>				<i>Not at all confident</i>			
Stakeholder analysis	16	5	3	1	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Problem analysis	15	7	3		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Solution analysis	15	6	4		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Logframe matrix	12	10		3	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

I am confident that I can put together a good project proposal	11	7	4	3	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	I am not confident that I can put together a good project proposal
--	----	---	---	---	--------------------------	--------------------------	--------------------------	--

I would recommend this course to my colleagues	21	3	<input type="checkbox"/>	1	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	I would not recommend this course to my colleagues
--	----	---	--------------------------	---	--------------------------	--------------------------	--------------------------	--

Four days for the course was:	About right	17
	Too short	7
	Too long	1

What was the most useful thing you learnt on this course?

<p>The exercises- but found the timeline and budget table very useful</p> <p>LFA, all aspects of analysis, group activities to get feedback/advice, networking is important</p> <p>The problem analysis only because it lead me to realise the components that needs solution to support my purpose</p> <p>LFA guideline</p> <p>LFA</p> <p>Problem tree analysis</p> <p>Problem tree and solution tree will help me at work for issues we are now facing</p>
--

Developing the problem tree  
 Identifying problematic areas and securing ways to resolve problems  
 LFA  
 The logframe matrix  
 The process/steps in writing grant proposal  
 Logframe matrix  
 Validated some things I've been doing and especially in a more systematic way that makes "life" in proposal writing easier  
 The problem tree! Logframe matrix. Activity schedule  
 The process itself. It shows that I need to take the time to go through LFA process. Specifically, liked the logframe matrix, templates, problem/solution tree  
 To structure the different parts of the proposal so it is easy to discover my mistakes or gaps in the process  
 Working on the problem (tree) and finding solutions from the problems  
 Logframe matrix  
 The complete authentic process of writing meaningful proposal that will help my organisation solve the identified problems  
 The problem tree to solution tree  
 Logframe matrix, being able to categorise and organise the information needed for proposal  
 Problem tree  
 The tree - nice technique  
 Problem trees & solution trees can be used to develop climate change policy framework

The course would have been more effective if:

Please spend more time on M&E  
 It was in a larger venue. Other than that, it was very useful and necessary for developing nations.  
 It was perfect  
 Well done  
 We worked on an assignment to bring back to the class  
 We were allowed to change our teams (groups) to suit our interests  
 Participant were more quiet and placed their phone on vibrate  
 We had more time to write a draft of our proposal  
 Maybe one last half-day for the end activities- performances, certificate  
 We had more time to work on the proposal. Wanted more details. And finishing with written proposal  
 One full additional day will be devote for proposal writing and review by facilitators  
 The course material was divided. Maybe have the M&E separate along with the budget course in a separate workshop  
 There were more examples of things that actually happened  
 Same level of participants  
 Our top level management were aware of what we've been doing here this week. We should have a press release to report on this  
 There were more examples of real projects and project language in the presentations. Show more examples that are real life examples

Which topic(s), if any, do you want follow-up training on?

Grant proposal writing  
 The matrix logframe  
 Yes, but I need to practice more on this  
 logframe matrix  
 M&E  
 LFA - to raise confidence in using the LFA  
 I would not mind taking the same course again. I think it would really help my confidence  
 Budgeting, M&E  
 Still reflecting on this

Writing grant proposal, LFA & problem tree  
Any interesting topics that different from this training  
M&E  
M&E  
Proposal writing  
Proposal writing  
More on logframe matrix, more on proposal template  
Phase II: M&E; Phase III: Budgeting  
Budgeting in proposal, M&E  
Budgeting and M&E  
Project implementation and M&E  
Same topic, more people so that more people in Palau will understand what it takes to make a good proposal

Do you have any further comments or feedback about any aspects of the training?

It was really enjoyable and love the energizers. You guys are awesome! I learned a lot from the workshop. Everything was well presented.  
Overall the training was awesome and I recommend it to anyhow who wants to learn about grant writing.  
Even though I might need follow-up with the matrix logframe, I'm confident I can still successfully write a good proposal. The overall workshop was very educational.  
Thank you for a great workshop. Please come again!  
Ye more exercises on the logframe matrix  
Little less noise or people talk one at a time  
The facilitators were very effective in delivering the course in a more "hands on" manner as opposed to lecturing  
Thank you so much for the patience with us, despite a lot of interruption  
I like the fact that there were 2 trainers. Not bored with one tone of voice. Come back to Palau!  
Excellent job in having a pragmatic and practical approach in doing this workshop!  
The training was helpful to me, significantly on grant writing  
Will probably have more questions as I field test, or put skills into practice.  
Thank you for the templates, donor list for climate change, for all the great advice and your patience.  
Martin & Damien are awesome!  
For the first time, I feel confident in writing a full proposal, not just assisting or contributing to a small part of the proposal. Also, last but not least, Martin & Damien rock!  
It was great!  
Training venue sucks!!!  
Palau State Government rep must be invited since most of the proposals/problems/solutions name them as stakeholder  
More lecture time with one real example or 'case study' throughout the course so we can see it developed.  
See you next time  
Excellent  
Martin and Damien are excellent facilitators and teachers. Please come back to Palau and do more of this.
